2009-2014
Received my Systems Engineer degree on the Santa Maria University in Venezuela.

JOB EXPERIENCE

Software Developer II
2021

Working for Prisma Medios de Pago in the migration of an old system from outdated tech to the more current and safer technologies. I have the opportunity to work with skilled programmers and develop solutions that will help the business to grow and provide better solutions for customers.
Main stack: Java 11, MySQL, React, MongoDB

Application Developer
2018-2021

Worked on Clover Argentina on the first smart POS in the region; developing, maintaining and adapting both backend and frontend to adjust to local market and

business necessities working side by side with USA team to ensure best practices via code review. Main stack: Java 8, MySQL, EmberJS, JavaScript, React

Programmer Analyst
2017-2018

Took part of many projects for the consulting company CDA, developing and helping team to reach business goals for every one of these. Main stack: Java 8, Spring MVC, Hibernate, Jasper, PL/SQL, AngularJS, JS, Tomcat

Fullstack Developer
2015-2017

Working remotely for a Mexican startup called MenonitApp, mostly taking small projects on solo or duo with another developer, managing to create all sorts of things from web to backend. Main stack: Java 6, PHP, MySQL, JS, HTML/CSS, Bootstrap, jQuery
